INGLAZE is a part of the renowned In-Land® Group, a 35 year old conglomerate consisting of various verticals - Real Estate development, Hospitality, Architectural & Interior Design and Manufacturing. Over the last three decades In-Land® has carved out a name for itself as a brand synonymous with excellence, well known for bench-marking its quality standards, unwavering commitment and timely delivery across South India. **INGLAZE**, born out of the same values, specializes in design, manufacture, installation and service of precision-engineered, 100% customized Aluminium and uPVC windows and doors. Our range of energy saving and sound insulating products provide customers with a better quality of life, while its user-friendly design leaves customers emotionally satisfied.

TECHNICAL PARTNERS

We have partnered with some of the top system manufacturers in the world, to ensure our clients only get the best the industry has to offer

The logo for Greentech features the word "Greentech" in a bold, sans-serif font. The letters "Green" are green and "tech" are orange.

uPVC Doors & Windows

[TURKEY]

Aluminium Systems

[GREECE]

[MUMBAI, INDIA]

Greentech is a high quality uPVC profile manufacturer of European origin. Based on the designs and specifications of the erstwhile LG Hausys uPVC system, Greentech has fast become a worthy successor to LG in India. With a combination of uncompromising quality, extended warranties and an excellent supply chain management, Greentech has quickly cemented its position as one of the country's most sought-after premium profiles.

Lead free: 100% free of lead and other additives, making it a green product that is safe for you and family.

Air and Water Tightness: The use of co-extruded EPDM gaskets ensure there is zero air or water permeability.

Sound Insulation: Although sound insulation depends greatly on glass type and thickness, Greentech profiles minimize the transfer of sound by using special hardware and gaskets between frames

Energy Efficiency: With a u-value between 1.5 to 2.5 and multi chambered structures, Greentech profiles prevent transfer of heat inside your house

Long Lasting Strength: Most uPVC profiles tend to change their color in few years' time due to sustained UV exposure. Greentech, however, offers a 15 year warranty which is unmatched in the Indian market.

Smooth Operation: With a built-in uPVC guide rail system you will never struggle with sliding your window open/shut (as opposed to other profiles where after-market metal guide rail is added causing much friction while sliding)

Safe and Secure: With concealed reinforcement to withstand high wind pressure and fluctuating loads in high rise buildings

SOUND INSULATION

WIND RESISTANT

SAVES ENERGY

TERMITE PROOF

ELEGANT LOOKS

WEATHER RESISTANT

ENHANCED SECURITY

ECO FRIENDLY

LOW MAINTENANCE

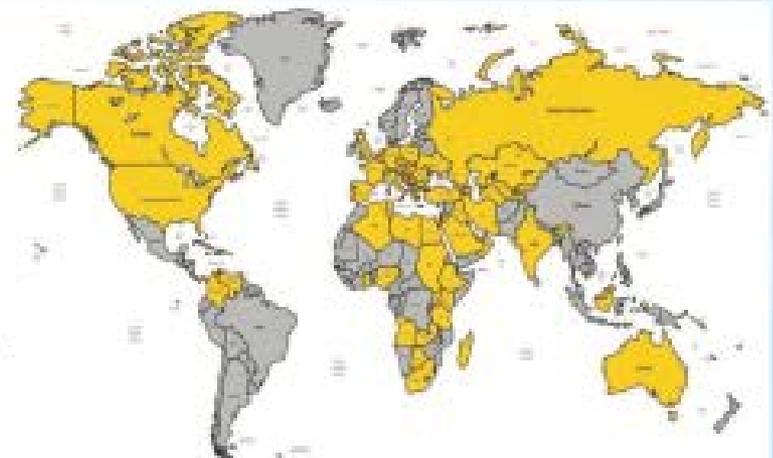

Alumil S. A. is a Greek company that specializes in research, development and production of high-end aluminium architectural systems. With more than 30 years of experience and 2,200 employees it is one of the most advanced companies globally, owning state-of-the-art production lines in 12 factories across Europe. By focusing always on the specifications and the requirements of the most advanced markets worldwide, ALUMIL has created a product portfolio, which incorporates an impressively wide range of innovative products that respond perfectly to the modern building needs.
